Introduction		xi
Acknowledgments		xvii
Abbreviations		xxi
Note on Transliterations		xxiii
1.	**The Great War and the Invention of Soviet Science**	1
	Science, Industry, and Military in the Late Russian Empire	2
	The War Crisis	5
	The Idea of Research Institutes	12
	The Study of Natural Productive Forces	17
	The Network of State-Sponsored Research and Development	19
2.	**Socialist, or Big, Science**	23
	Revolution and the War's Legacy	24
	From Optical Glass to the Optical Institute	32
	From the Optical Institute to an Optical Industry: Modernization, Soviet Style	37
	The Transition to Big Science	43
3.	**Freedom, Collectivism, and Electrons**	47
	Freedom as Problem	48
	The Origin of the Collectivist Metaphor	52
	Liberated Holes	56
	The Collectivized Electron and the Bloch Electron	59

The Phonon and Quantum Individuality 64
Shared Excitation 69

4. **Lev Landau's *Wanderjahre*, or Theoretical Physics in the Context of Cultural Revolution** 73
Education of a Soviet Scientist 74
Rockefeller Philanthropists and Bolshevik Russia 80
A Quantum Rebel 85
Theoretics and the Cultural Revolution 88
The Kharkov School 92

5. **Scientist under Stalin's Patronage: The Case of Piotr Kapitza** 99
Expatriate 100
Prisoner 106
Missionary 109
Client 114
Minister 120

6. **"To Catch Up and To Surpass …"** 126
Before Fission 127
As if it were not about the Bomb 131
Atomic Secrets 135
Strategic Choices 141
Socialist Management at Work 146
The Bomb and the Fallout 152

7. **President of Stalin's Academy: The Mask and Responsibility of Sergei Vavilov** 158
Early Career 160
Rise with and within the Academy 165
The Call 170
Political Profile 175
Political Writings and the Ideological Image of Soviet Science 179

8. **Games of Soviet Democracy** 186
The Campaign of Ideological Discussions in Sciences, 1947–1952 188
Exercises on the Philosophical Front 191
Games of Intra-Party Democracy 197
Opening Pandora's Box 203
Resolving the Controversy and Defining Consensus 207
Soviet Ideology and Science 214

http://www.worldscibooks.com/physics/p307.html

9. **Modernist Science, Ideological Passions** 217
Debates about the New Physics 219
Professors vs. Academicians 226
Anatomy of a Discussion 229
Paradigm Shift, Soviet Style 235
Changing Guards 240

10. **Collective Excitations** 245
Electrons Free and Trapped 248
Arrested Electrons and the Polaron 251
The Exciton and the Collectivist Alternative to Band Theory 254
The Roton and Collective Excitations 259
The Plasmon and the Collective Movement 265
The Prose of Collectivism 272

11. **Dialogues about Knowledge and Power in Totalitarian Political Culture** 276
The Trinity of Higher Knowledge 277
Elements of Soviet Metaphysics of Knowledge and Power 279
The Bolshevik Pact with the Specialists, and Its Failure 283
The Stalinist Pact with the Intelligentsia 287
Post-War Negotiations about Power 291
The Post-Stalin Settlement 295

Conclusion 301
Bibliography 307
